***Allowable Subject Matter***

Claims 39-76 are allowed.

The following is an examiner's statement of reasons for allowance: Applicants' claim amendments and arguments filed 17 July 2004 are persuasive. Upon reconsideration and analysis of the Cannone reference with respect to applicants' claims, it is noted that Cannone does not disclose a singular wire element which has a non-rectangular transverse cross section at a point between its ends, and a rectangular transverse cross section at an end. There is no suggestion in the prior art to modify the Cannone invention to obtain two claimed types of cross sectional areas on one wire. Since additional processing steps would be required to obtain applicants' claimed grid geometry, one of ordinary skill in the art would not be motivated to modify the prior art to obtain the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
